NEXT: Cloning the Egro UI Software

Observe the safety instructions in the installation manual of each machine!

This operation should only be conducted by trained and qualified technicians!

Machine:	Egro NEXT
Serial number:	-
Software:	App Version 2.3.10 / SW CB V10.08 / EgroTech SW V10.24
Tools needed:	USB DRIVE
Working time:	approx. 5 min.
Material:	Empty USB DRIVE

No.	ID	Description	Amount*
-	-	-	-

* Amount is written as pieces except marked different.
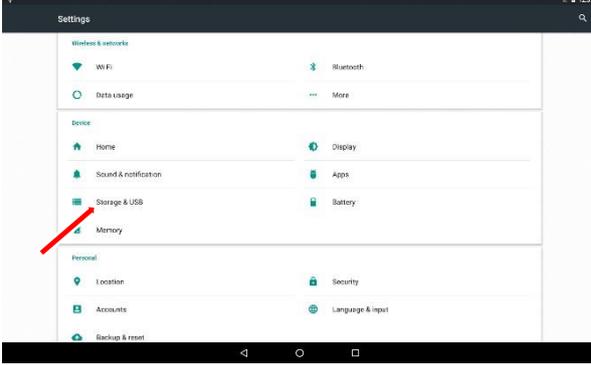

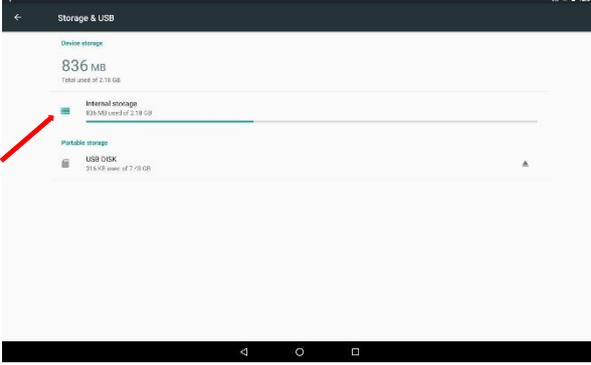

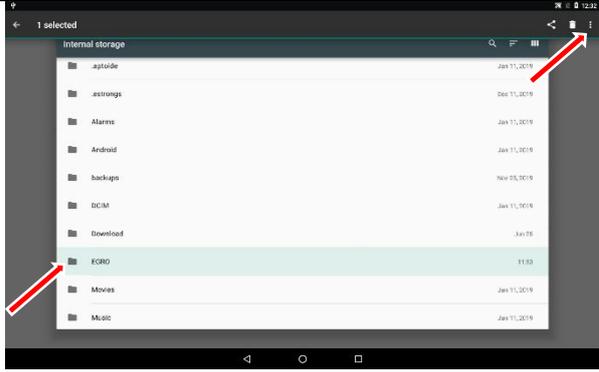

Table of contents
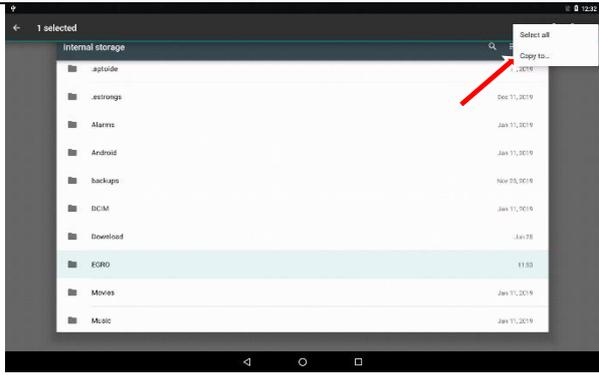

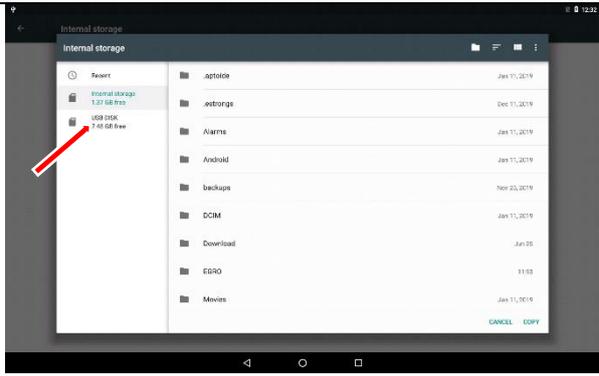

**Important**

All machines must have the same version of the Egro UI software!

Saving the EgroUI data to the USB DRIVE (Part 1)

Machine to be cloned

Instructions	Pictures
1. Click on «Cleaning and Settings».	
2. Enter «Technician Password»: 1849.	
3. Insert USB stick.	
4. Select «General settings» and then «Backup».	

Instructions	Pictures
5. Choose «USB DRIVE» identification number as the target location.	
6. Safe the backup data to the USB DRIVE.	
7. Go to «General Settings» and select «Exit device lock mode».	
8. Press the «Home Button Launcher».	
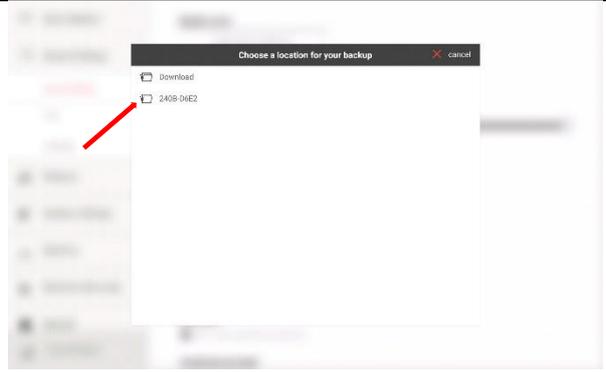

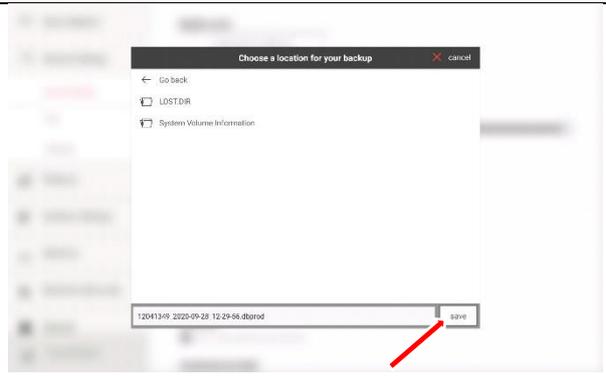

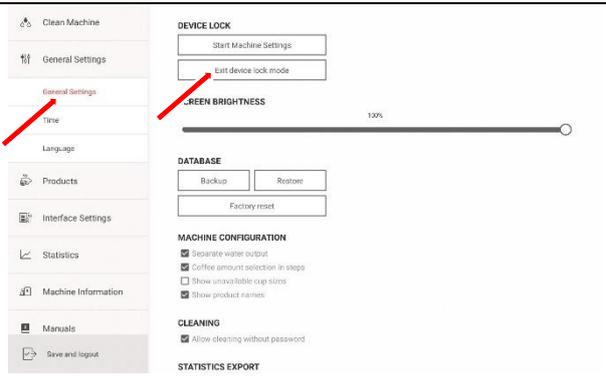

Instructions	Pictures
9. Select «Settings».	
10. Select «Storage & USB».	
11. Select «Internal Storage».	
12. Select «Explore».	
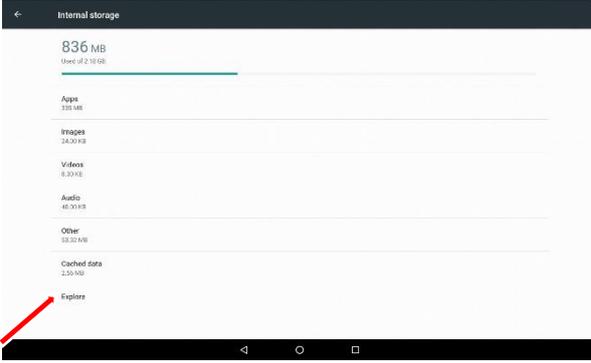

Instructions	Pictures
13. Search and mark "EGRO" by pressing the line for about 2 sec. The line is then marked light blue. 14. Press the «Drop down» button (the 3 dots).	
15. Press on «Copy to» in the drop-down menu.	
16. Select «USB DISK».	
17. Press «Copy».	

| Instructions	Pictures
18. Select «USB-DISK»	
19. Check if the folder "EGRO" has been saved on the USB DISK	
20. Hold down the «backup» folder on the USB-DISK until the line turns light blue. 21. Delete the folder «backup» with the «Ricycle bin» key. Note: The backup files (history) of the main machine need not be cloned.	
22. Hold down the folder «crash_reports» on the USB-DISK until the line turns light blue. 23. Delete the folder «crash_reports» with the «Ricycle bin»-Taste. Note: A folder «crash_reports» (history) is created only in case of a crash of the Egro UI software. Therefore, it does not need to be cloned from the main machine.	
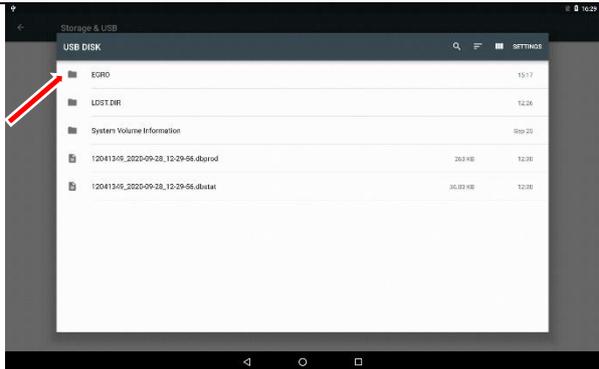

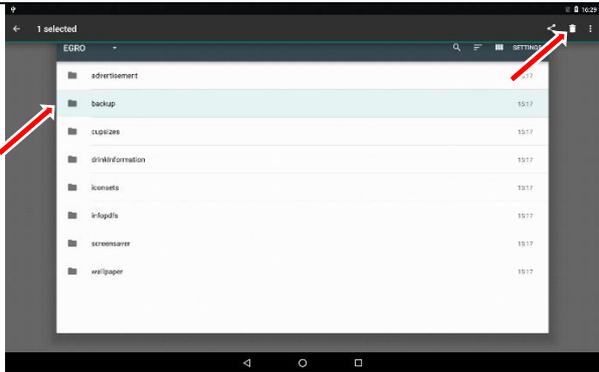

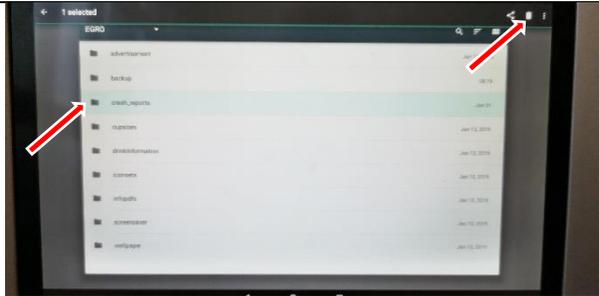

| Instructions	Pictures
24. The USB-DISK now shows the following folder structure. 25. Press «Recent key» (□).	
26. Close all open screens by swiping them to the side.	
27. Press the «Home Button Launcher».	
28. Remove «USB-DISK. 29. Close the flap of the grounds drawer.	
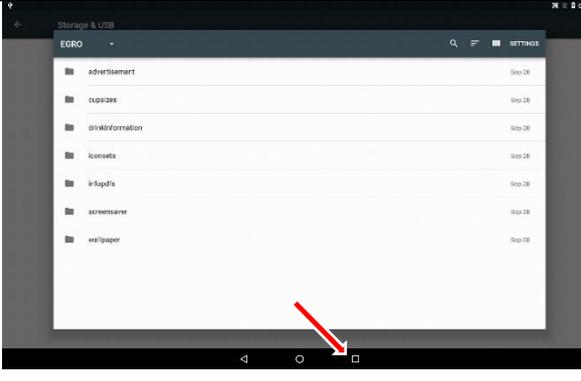

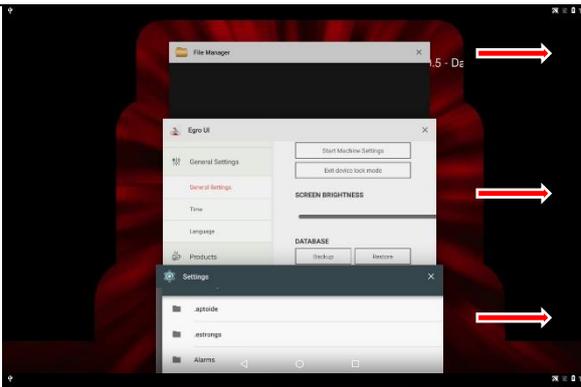

Instructions	Pictures
30. Screen «Choose your drink» appears. Note: The data of the main machine is now stored on the USB-DISK. They are now available for cloning other machines.	
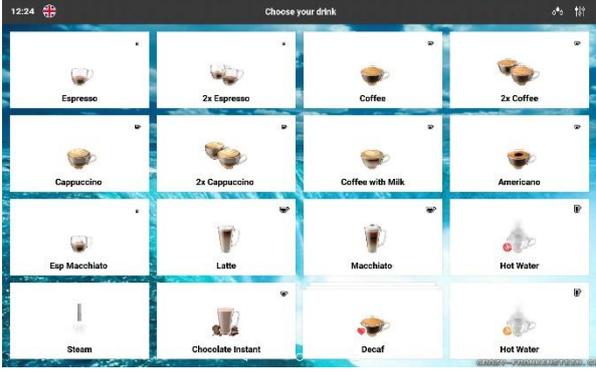

# Transferring the EgroUI data to the new machine (Part 2)

Cloning machine

Instructions	Pictures
1. Click on «Cleaning and Settings».	
2. Enter «Technician Password 1849».	
3. Insert «USB DRIVE».	
4. Go to «General Settings» and select «Exit device lock mode».	

Instructions	Pictures
5. Press the «Home Button Launcher».	
6. Select «Settings».	
7. Select «Storage & USB».
